Professional Summary

Software Engineer with hands-on experience in backend development, AI-based systems, and cloud infrastructure. Experienced in building scalable microservices, financial systems, and data processing workflows using Go, Python, and modern cloud platforms. Skilled in REST API development, data migration, automation, and deploying applications on cloud environments such as GCP and AWS. Interested in opportunities across Backend Engineering, AI Engineering, Infrastructure Engineering, and Cloud Engineering domains.

Technical Skills

Programming: Go, Python, JavaScript, TypeScript, SQL, Java

Databases: PostgreSQL, ClickHouse

Tools: Nginx, Docker, Git, Linux, Metabase

Frameworks: Kratos, FastAPI, Node.js

Cloud: Google Cloud Platform (GCP), Amazon Web Service (AWS)

Concepts: REST APIs, Microservices, Data Migration, Financial Systems

Professional Experience

Backend Engineer | Stitch (Fintech)

December 2025 – Present

- Developed backend microservices using Go (Kratos framework) supporting independent fintech services including Loans, Transactions, Ledgers, Cards, and Payments.
- Built REST APIs to manage loan processing workflows, transaction handling, ledger recording, and card-based payment operations.
- Maintained financial ledger and transaction data ensuring accuracy, consistency, and reliable financial record tracking.
- Executed large-scale data migration tasks using Python and FastAPI to transfer structured financial data between systems.
- Deployed and maintained backend services on GCP Compute Engine using Nginx for secure routing and PostgreSQL for transactional storage.
- Utilized ClickHouse for analytics workloads and integrated Metabase dashboards for financial reporting and operational monitoring.
- Optimized SQL queries and backend workflows to improve transaction processing performance and system efficiency.

Application Developer (Part-time) | HAWC

July 2025 – Present

- Developed backend services using Python and Node.js and frontend applications using React and React Native.
- Built automation features and integrated REST APIs to support dashboard functionality and reporting workflows.
- Implemented Docker-based deployments and collaborated with team members to maintain stable application releases.
- Maintained technical documentation and supported feature enhancements across application modules.

Data Science Intern | WovvTech

June 2025 – November 2025

- Developed Python-based data scraping scripts to collect structured data from multiple external websites.
- Built automation programs to clean, organize, and store scraped datasets for downstream analysis workflows.
- Collaborated with senior engineers to improve data collection processes and enhance overall system reliability.

Technical Projects

- AI-Powered Course Enrollment Platform:** Developed backend APIs and automation workflows using Python and JavaScript to manage course enrollment processes.
- NLP Research Project:** Implemented transformer-based NLP models and optimized training workflows for text analysis tasks.
- Real-Time Chatbot System:** Built FastAPI-based chatbot backend integrated with frontend interface for real-time communication.
- IoT Accessibility Tool:** Developed object detection system supporting real-time environmental interaction workflows.

Education

- B.E. Computer Science** — Kongu Engineering College, Erode | 2022–2025
- Diploma in Computer Science** — PSG Polytechnic College, Coimbatore | 2019–2022

Certifications & Achievements

- Data Analytics Essentials — Cisco Networking Academy
- Data Analytics and Visualization — Accenture
- Privacy and Security in Online Social Media — NPTEL
- Best Project Award — IoT Accessibility System
